We do not doubt from the testimony, that Elliott will be bailed to answer to the charge of homicide at the December term of the Criminal Court—it, indeed, he be not dismissed "scot free." We shall have to bring up general news to-morrow.

WASHINGTON, August 18, 1845. Hunger and Thirst at Washington-Woes of the Office Seekers-Happy Dogs the Office-holders-Will Nobody give me an Office or a Pair of Breeches.

I will heed what you say as to information concerning any important political moves which may come to my knowledge; but at present there appears to be quite a stagnation, both in political changes and in projected movements. We, among some of us here, ascribe much that has gone wrong in New York, in the way of appointments, to Gov. Marcy. You need not expect very prompt work on the part of the subordinates, when there is so much slackness evinced at head quarters. A large majority of the clerks in the War Department are whigs, and until very recently every high clerkship throughout all the departments, with now and then an unaccountable exception, was in the hands of our opponents. This is the case in a large majority of instances, but why is it so, and why it is suffered to remain so, is past my divination. There are some changes talked of as likely to take place in the beginning of next month, but I have learned to put little faith in such rumors, as I find they are sure to arise at the end of each month. There can be nothing effectual accomplished until the whigh leads of bureaus are changed. The Commissioner of Pensions and the Commissioner of Indian Affairs are both wings, and their subordinates are mostly whigs; and I understand they set their faces against any removals in their offices, as they very naturally would. The same may be said of Peter Hagner, First Auditor; he is a wing, and his subordinates are mostly whigs; and of course he is opposed to supplying their places with democrats.

It is also said that there will be more thorough work after Congress meets; but it is a long cry till then; and except in a few instances, the reason for the delay has very little connexion with the act to be performed. Gillet, the Register, and Burke of the Patent Office, are the only ones who have come any where near the mark our opponents. This is the case in a large majority

APPOINTMENTS BY THE PRESIDENT .- James McKis-APPOINTMENTS BY THE PRESIDENT.—James McK.18siek, of Arkansas, to be agent of the Cherokee nation of Indians west of the Mississippi, to t ke effect on

The Governor of Guadaloupe, Rear Admiral Gourbeyre, died at Point-a-Petre on the 7th ult.

The following are the only returns received since our previous publication. In a few days we shall have the full official returns, when the exact state of parties in the different States will be correctly

known, and something like a just conclusion arrived at, void of speculation:

ALABAMA.—With the exception of some ten or twelve counties, we have reports of the vote for Governor throughout the entire State of Alabama, which render certain the election of Joshua L Martin, over Nathaniel Terry, the regular candidate of the locofoco party, by from two to three thousand majority. The majority for Henry W. Hilliard, the whig representative to Congress from the second district, is upwards of one hundred and fifty votes.

Tennessee—Mr. Turney is elected in the White district. We are now able to announce that the Senate will stand 13 democrats to 12 whigs. Two years since, 14 whigs to 11 democrats. The House will probably contain 40 democratic and 35 whigh members. Two years since there were, in that branch, 29 whigs to 36 democrats.

The following Congressmen are known to be elected:—First district, A. Johnson, L. F.; 2d. Col. W. E. Cocke, W.; 3d. John Crozner, W.; 4th. Alvan Cuilam, L. F., no opposition; 5th. G. W. Jones, L. F.; no opposition; 6th. B. Martin, L. F.; 7th. M. P. Gentry, W.; 8th. D. J. Peyton, W.; No news from the 9th district.

Kentucky.—In the sixth district, where McKee, a white candidate, was supposed to be elected, the locofoco candidate, has succeeded. There were two whigs in the field. The delegation in the next Congress will, consequently, stand 7 whigs and 3 locos.

Lowa Election.—The election in this Territory

locos.

Iowa Election.—The election in this Territory is for Delegates to Congress. Lowe, (whig.) and Dodge, (dem.,) are the candidates. Only a few returns have been received. Lee county gave Dodge 350 majority; Muscatine 25 do.; Desmones 15 majority for Lowe, (whig); Henry 275 for Lowe; Louisa 130 do.; Scott 30 do. The vote for and against the constitution runs about the same way.

St. Mary's County, Maryland.—The Beacon says, the following persons (all whigs) have ansays, the following persons (all whigs) have announced themselves as candidates for the next House of Delegates:—William H. Dunkinson, Dr. P. F. Combs, John A. Jones, and Joseph B. Smith.

Baltimere is usually behind New York and Philadelthough from present indications, such will not be the case this year. The bustle of business has already com-

case this year. The bustle of business has already commenced, and as it generally continues a month later than in the northern cities, an extensive business will doubt less be transacted. The general prosperity of the country is indicated by the long and well filled purses they bring with them to pay off old accounts.

The Hon. George Bancroft, Secretary of the Navyarrived in the city last evening; his visit is rather of pleasure than business. He walked up Gay street to look at the Odd Fellow's Hall, in which he made that great speech before the National Democratic Convention, in favor of Mr. Polk, which secured him a seat in the Cabinet

So much time having been required to ship the horses of the Flying Artillery, they have not set sail yet, though I learn every preparation has now been completed, and that they are fully ready to start this morning. The latest news from 'Mexico, 'indicates that war is not so close at hand as was at first anticipated, but that it must ultimately come. The troops can, however, get their hand in, by quieting the fractions Indians.

We are to have a grand military and civic parade today, on the occasion of the funeral of Gen. Wm. McDonald, who was an officer in the Revolution, and also at the battle of North Point, during the last war.

The number of deaths in this city during the week ending on Monday, was only 54—of which number there was 20 under one year, and only 16 over 21 years. This indicates that Baltimore is at the present time the most heaithy city in the Union, according to population.

Joe Cowell, the vetoran comedian, who has been succersfully acting the part of "mine host" of the Fayette house, in this city, for some time past, having retired from the stage, is about to sail for Europe on husiness. He have never met with. Ward meetings were again called last week, in each of the twenty wards, and truly speaking there was no one attended at but three of the wards, and then there was a difficulty to find five persons to appoint as delegates. A list of delegates are now said to have been appointed, but how or when, no one knows. They are to meet at Union Hall this evening, to make nominations for Congress and Legislature, and I think I shall attend out of curiosity, as the number of delegates required far exceed the number of persons attached to the party.

Stack Markert—There is depression in our usually depressed stock market, and the etcain is to 76 per cent, at which sales were yesterday, 461 of which were disposed of to city butc

doing in tye flour, last sales at \$3.

The market continues fairly supplied with wheat. The mills being pretty well stored, sales are rather dull. We quote good to prime white wheat, for family flour, at \$0. to \$9.0 cents; prime reds at 75 to \$4, and ordinary to good at 7.2 to 78 cents per bushel. A further improvement has taken place in corn. Sales of Maryland white at 45 a 47 cents, and of yellow at 47 a 48; a sale of Pennsylvania yellow at 49 cents. Outs are selling at 30 a 31 cents; and Maryland rye 52 a 57 cents. Pennsylvania rye 50 cents. rye 30 cents.

Sales of barrelled whiskey are now being made at 23 a 23 cents, and of hogsheads at 22 a 22 cents per gallon.

The article is dull.

There is nothing of interest to notice in our city or vicinity. The weather is dull and heavy, with occaional sprinklings of rain. At present there is but one subject that at all engrosses the public mind, and that is, the nominations of candidates to the several offices in our city and county for the fall election. Each political oarty is at work pulling, dragging, twisting and turning to make the fairest show.

The stock market was active, and exhibited some improvement in prices, as will be seen by the report of the Boards.

Rumors of War-A New Iron Steamer-The Independence Guards - Mayor Davis, &c. There was a private rumor in circulation here yesterday, that the Mexican government, through its agents, had, within the past few months, contracted largely with several ship builders in the British provinces, to build a cheap class of small vessels, say from 100 to 200 tons, to be armed and manned for purposes unknown. It is sur-mised, if these vessels have any existence beyond rumor, that in the event of Mexico declaring war, they will pounce upon our European trade, while our ships of war are out of the way, in the Gulf of Mexico, and make a rich harvest by carrying the prizes into the neutral ports of Nova Scotia. This rumor has gained some strength, from the fact that the Mexican papers have on several occasions thrown out some loose hints in refer ence to our commerce. Two or three hundred thousand dollars, devoted by Mexico to such an undertaking, ence to our commerce. Two or three hundred thousand dollars, devoted by Mexico to such an undertaking, would in a few months sweep many a fine ship from the sea, and capture a vast amount of wealth, before we could be on our guard against them. It is a fact, that not one of our merchant ships in a h-indred carries a single gun on board, and would, therefore, in the event of being attacked, be compelled to surrender without striking a blow. We look upon Mexico with too much contempt. Although she may be comparatively powerless, yet her government is not void of cunning; nor are there wanting those who would aid her to liquire this country. Prudence, therefore, on our part, might prevent much loss of both life and property. Say that a small fleet of vessels, such as I have alluded to, were to dart out of the ports of Nova Scotia, they could, with ease, in the present defenceless state of many of our anthors, enter and destroy large towns, and even the city of Boston itsell raul Jones, inaving the command of such a fleet, would make our government stare. But as these remarks have only rumor for their authority, I will not pursue the subject further.

An iron steamer, the second one built in Buston, was launched at high water yesterday, from flast Boston—She was built by Mr. Tufts, the machinist, and is designed for an ice and tow boat in the harbor. She is about 300 tons measurement, and will have two submerged propellers aft, according to the plans of Capt. Ericason. She is a very fine looking vessel, and will no doubt do good service during the winter.

The Independence Guards, of your city, are expected to arrive here next week. They will be well taken care of. Our military men know how to treat visitors to a charm, and if the New Yorkers do not fare well, it will be because all the good things must be exhausted, or gone out of town. The Mayor, I am sorry to state, is again very unwell—confined to his chamber. The hon-

During the seven months of the present year there have been built at Cincinnati seventeen steamboats, with an aggregate tonnage of 3,215 tons, and at an aggregate cost of \$243,000.

THE WONDERFUL SUCCESS
Which Dr. Folger's Oloscoman, or All Healing Balsam has met with, not only in its sale, but also in the cures which it has effected, in persons who were in a hopeless condition, has convinced the most sceptical of its extraordinary curative properties, and established in the most sceptical of its extraordinary curative properties, and established its claims to the name of the name of the most septical of its extraordinary curative properties, and established its claims to the name of the converted within the last two the name of the converted within the last two mouths that Folger's Oloscomian will produce a cure quicker than any other remedy in the world, and references can be given to persons in and out of the city who have experienced its wonder laistrictes, who had tried for years all other remedies in vain.

Mr. WILSON, a bricklayer, residing at Hoboken, N. J., had ried every remedy which he could hear of for the relief of suthma, and had spent more than one hundred dollars in endeavoring to procure help' but in wish. He commenced using the Oloscoman January 21st. The first dose he took gave him relief, and two days afterwards his wife called to say that the small quantity of this remedy which he hap taken had done him more good than any and all the medicinese he had ever used in his life.

yields to its effects. It soothes the troublesome cough and gives refreshing slumbers to the weary—it allays the pain in the side and soreness in the chest, and enables the person to expectorate easily, while treatirely restores the secretions of the system and expedites returning health.

JAMES B. DEVOE, 191 Reade street, had long been complaining of a soreness in the chest, accompanied with a short, hacking cough—heraised matter freely, has lost his appetite and felt alarmed at his situation. He had tried various remedies without any beneficial effect. His shortness of breath and pain in the side continued to increase. He used one bottle of the Olosaosian, and is restored to health.

MAGNETIC REPELLANT.

DR. A. POWER, member of the Royal College of Surgeous of the United States, and for several years assistant to the late Sir Astley Cooper, can be confidentially consulted at his private offices, No. 15 Chambers street, New York, upon all diseases of a delicate nature—to the treatment of which has confined his practice for the last 17 years.

Syphilis, Gonorrhoga and Gleets, whether recent or of long standing, cured in a few days, without the use of mercury or coparty, or no charge made.

Stricture, which, of all diseases, is the most insidious, often commocating and steathily advancing where its existence is not even dreamt of, producing the most lamentable effects upon the mind and nervous system of the patient. Some of the most prominent symptoms are prostration of the natural energies, aversion to society, and the involuntary escape of a few drops of water, after, adjusting the clothes, subsequent to voiding urine. Hundreds of cases have been successfully treated upon my newly discovered system of Magnetic Reputsion, tims avoiding the intolerable poin and great danger attendant upon the rash introduction of instruments.

Self Pollution is a morbid habit, often arising with the inexperienced, and when once contracted, most difficult to overcome—producing in many instances, slicey, loss of memory, pains in the back and loins, nocturnal emissions, impotency and sterility: the sufferer is speedily enabled, under my treatment, to subdue this permicious practice, and the system is restored to its pristine vigor, by the use of the Electro-Magnetic Balim.

Fluor Albus, or Whites, Obstructions and Suppression of the Meusea, and all diseases of the female sex, have received a large share of my research and attention. I am the only qualified practitioner who has had the moral courage to antagonise the empiricism whi

and dissorms. Open from A. M. to 19 P. M.

MEDICAL DISPENSARY.

DOCTOR COBBITT, 19 Duame street, a Member of the Royal College of Surgeons, London, and Member of the Medical Society of New York, may be consulted in the treatment of a certam delicate disease. His long experience and close attention to this class of complaints—his pleasant, asie and expeditions mode of treatment—his extraordinary surcease during a long and extended practice for thatteen years in this city—and above all, his legritumate medical qualifications, are a few of the grounds on which he rests his claims.

Dr. Cobbett's mode of treatment is safe, effectual, and expeditions, not requiring either the use of mercury or restraint in diet or exercise.

Strictures cured in one or two weeks with scarcely any pain. Constitutional Debility—Those individuals who have indulged in a certain loathsome and secret habit, can poatively by restored to health and society. Mild cases removed in two to four days. No charge made unless cured. Remember, 19 Duane street, one door from Chatham street.

All letters murt be post-paid, and directed to Dr. H. Fawcet
196 Fulton street, New York

DOCTOR LAMERT is still confidentially consulted at his old office, 63 Gold street, between Fulton and Beckman, on all diseases of a delicate nature; his treatment being mild and judicious, requires neither mercury, restraint in diet, or hindrance from business pursuits. Recent cases cured in 3 or 4

drance from business pursuits. Recent cases cured in 3 or 4 days.

DEBILITY. NERVOUS OR CONSTITUTIONAL, arising from a too frequent indulgence of the passions of indiscreet youth, and thereby caseing nightly emissions, and eventually confirmed impotency, engage the Dr.'s strictest attention, his tobject being to restore the system, mentally and bodily, to that state of vigor nature originally designed.

STRICTURES, a disease frequently existing without the patient being the least aware, sometimes caused by mal-treatment of uninitiated medical pretenders, and sometimes by the neglect of the parties themselves, are, by the Dr. effectually cured, with out pain or inconvenience.

The Doctor being one of the few qualified advertising Surgeons in the city, guarantees a perfect cure, or no charge made. Let ters, post paid, enclosing a fee, immediately attended to, and ms dicine, with advice, sent to any part of the United States

DOCTOR MORRISON,

NORTH RIVER DISPENSARY, 2014. Fulton street.—
NORTH RIVER DISPENSARY, 2014. Fulton street.—
Doctor Morrison continues to be consulted confidentially on all private diseases, which he cures without mercury, or restraint in diet or pursuit. Recent cases, particularly "Gonor-thoea," he cures in 3 to 6, days.

STRICTURES OF THE URETHRA are cured by Dr. M. on improved principles, without pain or inconvenience to the patient. As the symptoms of Stricture are analagous with those of other affections of the urinary apparatus, none but experienced Surgeons should be allowed to make the necessary examination, as those affected with enlarged prostrate glauds, may suffer much injury from awkward practitioners.

NERVOUS AND CONSTITUTIONAL DEBILITY.—
This affection, and the train of evids resulting from a secret destructive habit in youth, inducing nocturnal emissions and ultimate impotency, are radically cured by Dr. M., on pat. ological principles, by restoring the system to a healthy tone and reinstating its original vigor. A perfect cure guaranteed, or no charge.

N. B.—Dr. M. holds no communion with medical pretsaders, who claim to be Surgeous, as he is, perhaps, the only qualified advertising Surgeon in the city. See his diplomas in his office, 304% Fulton street. Letters post paid and containing a fee will maure medicine and advice to any part of the Union.
